

Dear Graziela,

I found "your" Conference a delightful and useful event. Delightful because

- 1. the pretty atmosphere between your team and the speakers and participants,**
- 2. the excellent practical organization,**
- 3. the focussing on difficult items of Metrology, made visible by the character and content of the questions from the participants,**
- 4. the focussing on difficult items of Metrology, made visible by the choice of your speakers for essential characteristics of metrology in their presentaions,**
- 5. the truly impressive "side programme" amongst which the "Night at the Opera" was a foremost event, unexpected and admired by all Conference participants.**

Let me now wish you a few quiet days "away from it all" full of nice remembrances for what you have (again !!) achieved for other people's benefit!

Prof Paul de Bievre, Founding Editor-in-Chief of ACQUAL, Belgium
