

COMENTARII PRIVIND PT-Conf 2017

Dear Graziela,

I would like to congratulate you for the excellent organisation of PTConf 2017.

The quality of the various contributions and associated discussions were extremely useful for me. The selection of the exhibitors was also excellent.

I wish the continuation of these series of workshops which proves to be useful for the Romanian and International community.

Dear Graziela,

Thank you for the PT Conf.

My comments:

- **oral presentations were interesting and to a high standard covering many aspects of PT**
- **booklet of proceedings had excellent papers on the conference themes from around the world**
- **the MIC training course on Measurement Uncertainty was presented very well and the concepts will be most useful for PT providers**
- **overall the PT conference was well attended and was a success**

Dear Organizers,

Thank you very much for the opportunity as given to attend PT Conf event.

I think the venue it was a good choice as well the socializing activities.

Probably in the future more time is necessary for discussion, otherwise need to shorten presentations enhancing simply activity or expertize. In terms of the language I think the Romanian speakers may require improvement as sometime the vocabulary was intelligible.

Once again thank you very much.

Best regards,

Stelian Matei, Prof Dr Eng-Electromagnetica SA ,Scientific Manager

Dear Colleagues of PT – Conf 2017,

The sixth International Proficiency Testing Conference in Cluj Napoca met our expectations. Invited lecturers are experts with many years of experience in the field. Participants had the opportunity to listen to valuable lectures. Participants were given the opportunity to gain new insights into the uncertainty of analytical instrumental methods in relation to PT results. The conference was organized at a high level. The conference program was rich. Working groups have enabled the participants of this conference to be hired and exchanged contacts for further co-operation. The conference discussions have greatly contributed to disseminate knowledge and inovative ideas with a focus on Proficiency testing. The lessons learned will be used in our professional activity. The venue of the conference met the requirements for organizing this meeting of international experts. The course of the conference was seamless. Conference organizers were very friendly and nice. We like to take part in a similar conference in the future.

Best regards:

Ing. Angelika Kassai, PhD.

Dear Organizers of this year's PTConf,

Thank you very much for organizing this event. It was again very well organized!

We have always considered the PTConf to be a fruitful and effective conference for us.

Dear,

Regarding the PT Conference 2017, it was a pleasure to participate. Compliments to the organizers - excellent social program, interesting and useful themes and training course, good accommodation at Grand Hotel Napoca.

Looking forward to seeing you in 2019!

To the Conference Team

I would like to take this opportunity to express my thanks to you for a very informative conference which helped me to further advance my knowledge in areas of Proficiency Testing, Metrology, Traceability and Measurement Uncertainty. Also the session chaired by Georgeta Vulpe on ISO/IEC 17025 changes was very useful.

I enjoyed very much the folkloric performance and the walking sightseeing tour in Cluj-Napoca. On both professional and personal level I very much appreciated the time that I was able to spend with many of my peers throughout the event. Please convey my thanks to Graziela and the organising committee for a very successful event.

Dear Dr Guslicov,

PT –Conf 2017 was a great opportunity to meet scientists working and teaching in the field of proficiency testing (PT). There were many good lectures and I was particularly interested in topics like sampling PT, reference values, PT in food and cement industry. On the last day of the conference, the training course on Measurement Uncertainty presented an impressive content supported by practical examples. This was my second attendance at PT –Conf and I consider the conference very informative and valuable for my work.

**Kind Regards,
